## PROFESSIONAL SUMMARY

Passionate about IT and cloud computing technologies, I am highly motivated to contribute to innovative projects that transform the way cloud technologies are used. I leverage deep expertise in the field of IT to deliver efficient and scalable solutions, meeting the dynamic technological needs and ambitious objectives of a forward-looking company. As a pentesting trainee at Dataprotect, I am enhancing my cybersecurity expertise through practical, real-world experience in offensive security.

## TECHNICAL SKILLS

- Programming Languages:** Python, PowerShell, Bash
- Operating Systems:** Windows Server, Linux (Ubuntu, CentOS, RHEL, ...)
- Cloud Platforms:** AWS, Microsoft Azure, Google Cloud, Openstack
- Network and Security:** TCP/IP, DNS, DHCP, VPN, Firewalls, Load Balancing
- Databases:** MongoDB, MariaDB, Oracle
- Virtualization:** Proxmox, VirtualBox, Hypervisor
- Tools & Technologies:** Docker, Kubernetes, Git, Wireshark, Salesforce

## PROFESSIONAL EXPERIENCE

### Stagiaire Pentesting | DataProtect | Casablanca, Morocco | August 2025 – December 2025

- Implemented networks, administered Windows Server and Linux, and managed projects.
- Applied cybersecurity standards, conducted risk analysis, and learned cryptography basics.
- Introduction to Python and exploration of cybersecurity careers.
- Specialized in penetration testing: network, web, and mobile pentests, including countermeasures.
- Gained practical experience through company immersion.
- Developed soft skills and prepared for recruitment processes.

### Help Desk Advisor | Concentrix | Fez, Morocco | October 2024 – January 2025

- Provided technical assistance and user support by responding to service requests.
- Managed incidents quickly while meeting SLA requirements.
- Collaborated with Level 2/3 teams to escalate complex technical issues.
- Improved overall user satisfaction.

### IT Intern | Faculty of Science and Technology | Fez, Morocco | April 2023 – June 2023

- Set up a Proxmox environment for the development of a WordPress site.
- Configured OpenVPN in a container to provide secure remote access.
- Independently configured and tested the Azure DDoS Protection plan to secure cloud networks.
- Implemented Proxmox solutions for efficient resource management and isolation.

# EDUCATION

**Certificate in AWS Cloud Computing** ALX Africa, Casablanca, Morocco | 2025

**Bachelor's degree in Systems, Databases and Cloud Administration** Supemir, Casablanca, Morocco | 2024

**Diploma in Digital Infrastructure Cloud Computing option** OFPPT, Fez, Morocco | 2023

---

## CERTIFICATES

- Oracle Cloud Infrastructure Data Certified Foundations Associate | 2024
- Oracle Cloud Infrastructure for Sunbird Ed Speciality | 2024
- Cisco: Python Essentials 1 | 2024
- ALX Professional Foundations | 2025
- AWS Certified Cloud Practitioner | 2025

---

## PROJECTS

### Cloud-Native Microservice Stack | July 2025

- Designed and implemented production-grade cloud-native platform simulating enterprise-level microservices architecture
- Technologies used: Docker, Kubernetes, Python Flask, MongoDB, NGINX, Prometheus, Grafana, GitHub Actions, Helm
- Results: Created fully automated development environment with monitoring capabilities, demonstrating DevOps best practices

### Cloud Shift | May 2024 - June 2024

- Designed and implemented a comprehensive private cloud solution using Openstack for business requirements, focusing on virtualization, resource optimization and security configuration.
- Technologies used: Openstack, Linux, KVM, MariaDB, RabbitMQ, CI/CD
- Results: Successfully delivered scalable private cloud solution demonstrating enterprise infrastructure management capabilities

### Azure DDoS Protection | April 2023 - June 2023

- Developed comprehensive DDoS protection strategy to protect critical cloud infrastructure from volumetric cyber attacks
- Technologies used: Azure DDoS Protection, Azure Monitor, Log Analytics, Azure Security Center, PowerShell, ARM Templates
- Results: Successfully protected cloud infrastructure against volumetric attacks with 99.9% uptime during testing phases
